

# Lean Six Sigma Services

From

## MIME Solutions Ltd.

Our agile approach to business improvement is focussed on deployment, application and sustainability. This method delivers benefits throughout your business:

### Organisational Deployment

- Development of a customised deployment strategy
- Set-up of an LSS programme and programme management
- Selection of potential black-belts
- Management of organisational events (kaizen, value-stream mapping, baselining, etc)
- Selection of projects
- Development of Communications Plan
- Organisational sustainability reviews and health checks

### Training and Mentoring

- Development of a Training Hierarchy
- Provision of LSS awareness, champion and leadership training
- Delivery of certified and non-certified yellow, green, black and master black belt training
- Mentoring of yellow, green and black belts (training to certification and post certification)
- Capability profiling – actual, target, and plan to reduce gaps
- Provision of training and coaching to support data collection and analysis planning
- Specific LSS tool coaching

### Project Management

- Project set-up and health checks
- Project reviews (at key points in the DMAIC process)
- Design and facilitation of LSS project based events
- Management of LSS projects (delivery of sustainable change through use of LSS)
