

# **Project Management Toolkit – ‘How?’ Checklist**

<b>Project:</b>	<b>Project Manager:</b>
<b>Date:</b>	<b>Page:</b> 1 of 2
<b>Stage One check</b>	
Have there been any changes since Stage One completion? (Development of the business case and project kick-off may be some time apart)	
<b>Sponsorship</b>	
Who is the sponsor? (The person who is accountable for the delivery of the business benefits)	
Has the sponsor developed a communication plan?	
<b>Benefits management</b>	
Has a benefits realization plan been developed?	
How will benefits be tracked? (Have they been adequately defined?)	
<b>Business change management</b>	
How will the business change issues be managed during the implementation of the project? (Are there any specific resources or organizational issues?)	
Have all project stakeholders been identified? (Review the stakeholder map from Stage One)	
What is the strategy for handover of the project to the business? (Link this to the project objectives)	
<b>Scope definition</b>	
Has the scope changed since Stage One completion? (Has further conceptual design been completed which may have altered the scope?)	
Have the project objectives been defined and prioritized? (What is the project delivering?)	
<b>Project type</b>	
What type of project is to be delivered? (For example engineering or business change)	
What project stages/stage gates will be used? (Key milestones for example funding approval, which might be go/no go points for the project)	
<b>Funding strategy and finance management</b>	
Has a funding strategy been defined? (How will the project be funded and when do funds need to be requested?)	
How will finance be managed?	

## **Project Management Toolkit — ‘How?’ Checklist (*continued*)**

<b>Project:</b>	<b>Project Manager:</b>
<b>Date:</b>	<b>Page:</b> 2 of 2
<b>Risk and issue management</b>	
Have the CSFs changed since Stage One completion? (As linked to the prioritized project objectives and the critical path through the project risks)	
Have all project risks been defined and analyzed? (What will stop the achievement of success?)	
What mitigation plans are being put into place?	
What contingency plans are being reviewed?	
<b>Project organization</b>	
Who is the Project Manager?	
Has a project organization for all resources been defined? (Include the Project Team and all key stakeholders)	
<b>Contract and supplier management</b>	
Has a strategy for use of external suppliers been defined? (The reasons why an external supplier would need to be used for any part of the scope)	
Is there a process for using an external supplier? (For example selection criteria, contractual arrangements, performance management)	
<b>Project controls strategy</b>	
Is the control strategy defined?	
<b>Project review strategy</b>	
Is the review strategy defined? (How will performance be managed and monitored — both formal and informal reviews and those within and independent to the team?)	
<b>Stage Two decision</b>	
Should the project be progressed further? (Is the project delivery strategy robust enough for project delivery to commence?)
